

# Enhancing the Model Integration Workflow in Aircraft System Simulation using FMI & SSP

Industrial User Presentations  
Modelica Conference 2019, Regensburg

---

Magnus Eek  
Saab Aeronautics

**SAAB**

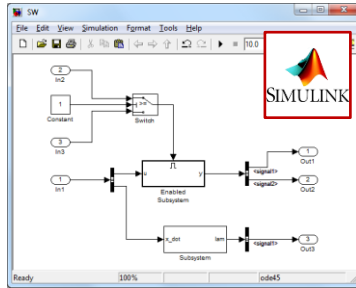

# Background: Current way of working at Saab

## Model-Based Development of Aircraft Vehicle Systems

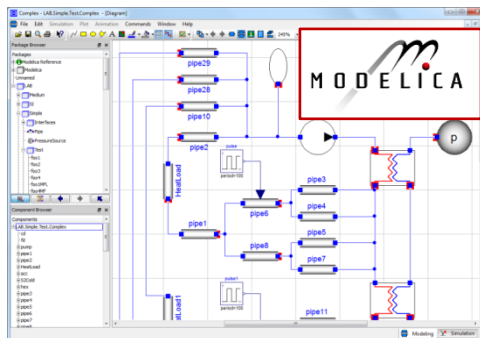

Design & Implementation of S/W

Test rigs & simulators

Test A/C

M&S of physical systems

# Future Needs in System Development

**SAAB**

# *open*CPS

**COLLABORATIVE R&D ON METHODS, STANDARDS & OPEN SOURCE TOOLS  
FOR **EFFICIENT DEVELOPMENT OF CYBER-PHYSICAL SYSTEMS****

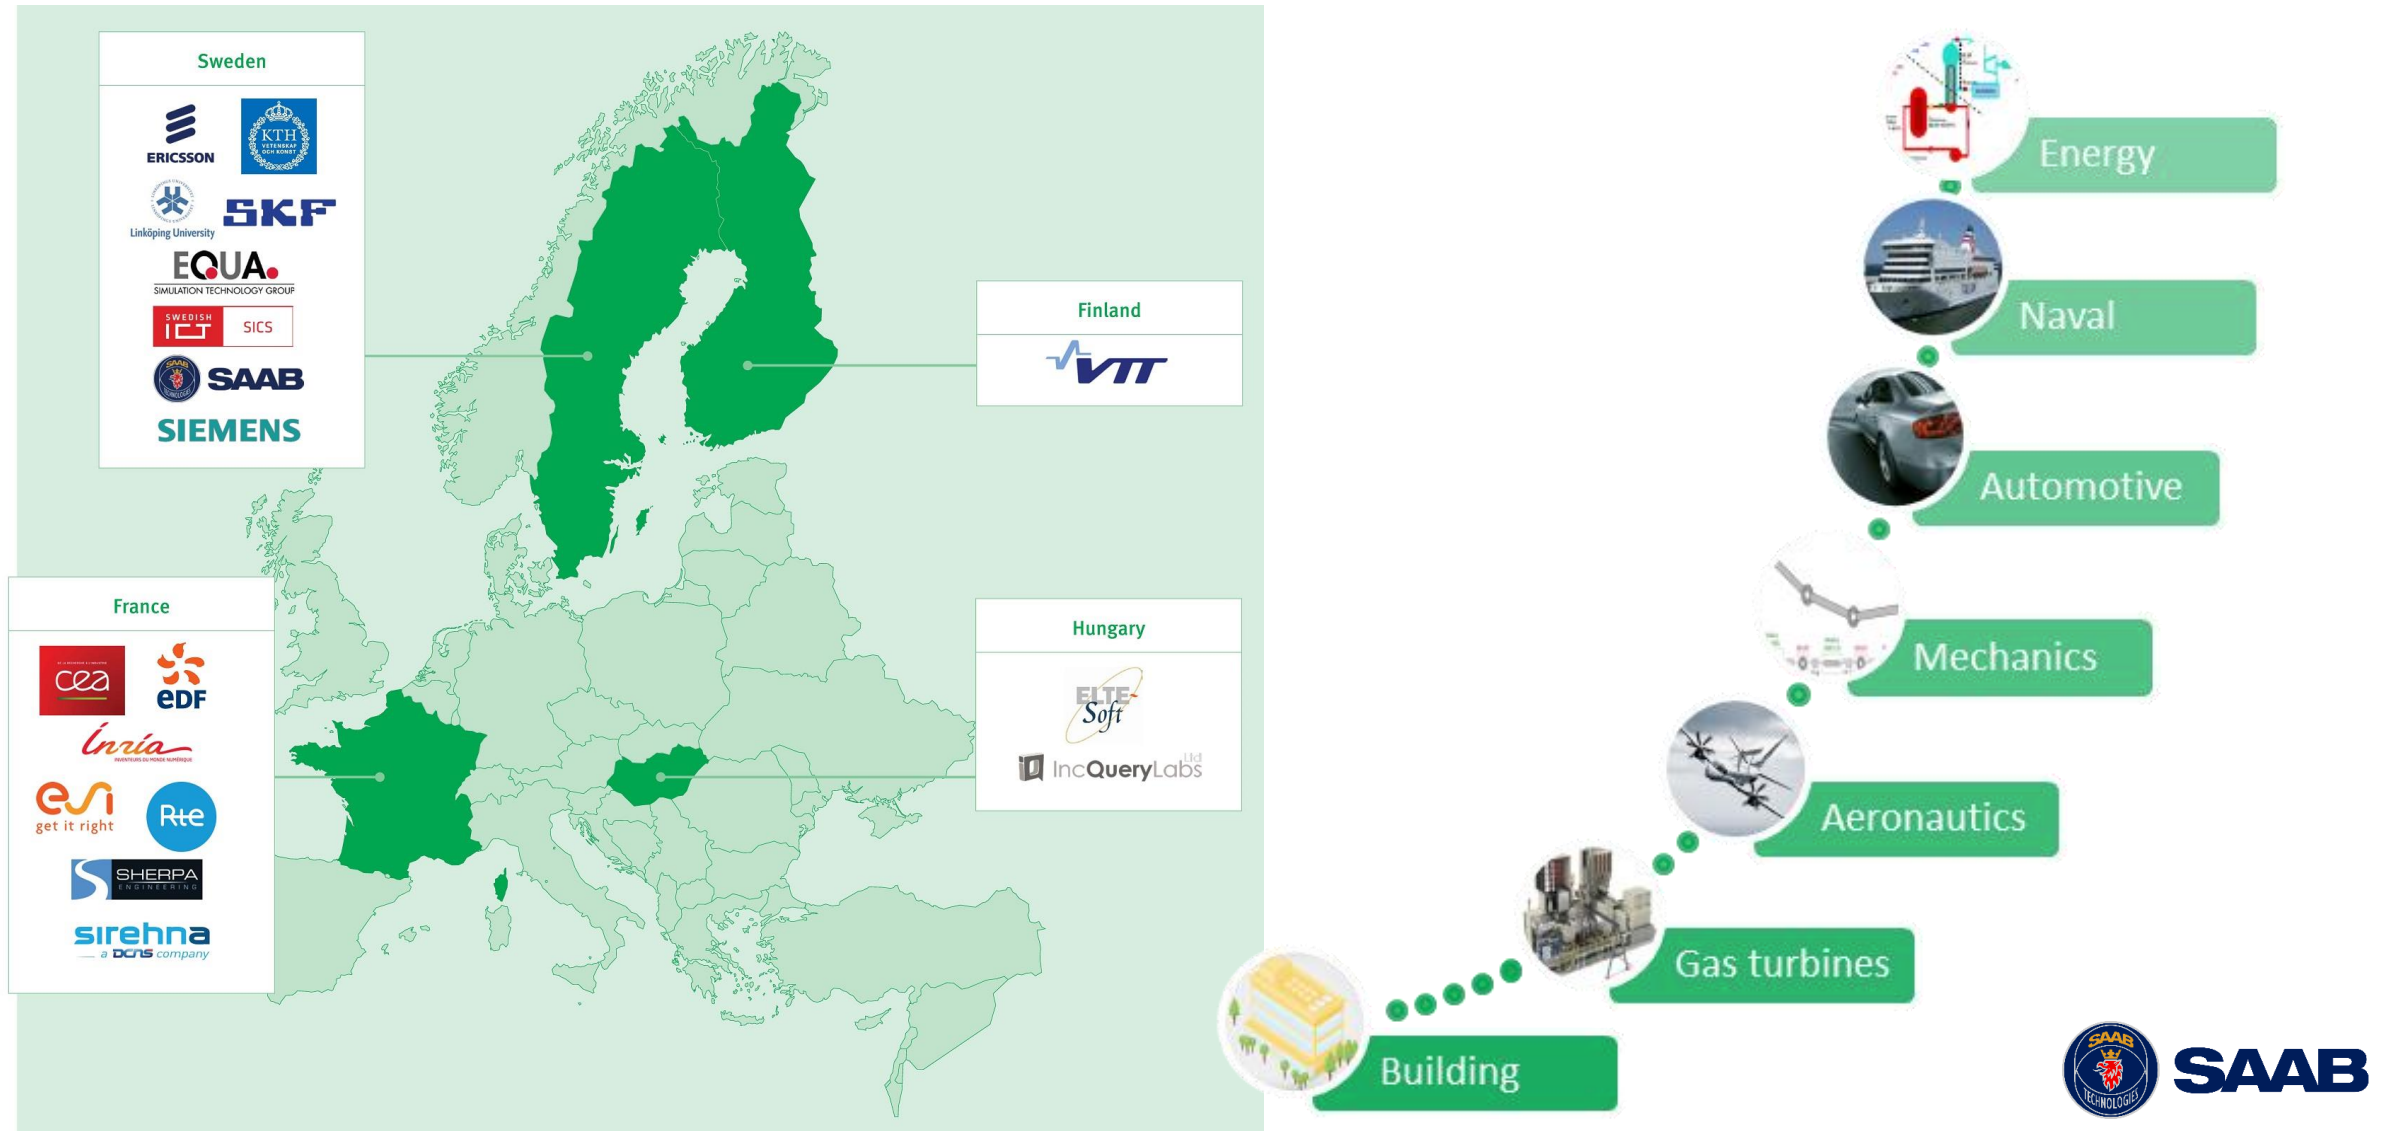

Duration: December 2015 to December 2018

4 countries: Sweden, France, Finland, Hungary

Current status: 46.5 person-years, 6.5 M€, 18 partners

Project coordinator: Saab

# Project Consortium & Industry Domains

# Innovation Areas & Industrial Demonstrators

---

Overall aim: Increase **front loading** capability in development of cyber-physical systems by enabling **large-scale simulation**

- FMI Master Simulation Tool including UML/Modelica Interoperability
- State Machine and Real-Time Debugging & Validation
- Efficient Multi-Core Simulation

**Joint Energy Demonstrator**  
Siemens, EDF, KTH, EQUA

**Aircraft Vehicle Systems**  
Saab AB, LIU

**Ship Decision Support System**  
Sirehna

**Tunnel ventilation HIL and SIL**  
EQUA

**Mechanical Bearing-related demonstrator using FMI TLM**  
SKF, LIU

**Vehicle energy management**  
Sherpa, CEA

# FMI Master Simulation Tool: **OMSimulator**

- Open source tool for **standardized, numerically robust, and efficient distributed (co-)simulation**
  - Functional Mock-up Interface (FMI) 2.0 CS & ME
  - System, Structure & Parameterization (SSP)
  - Transmission Line Method (TLM)
- Scripting support in Lua & Python, GUI support for composite model editing and simulation in OpenModelica & Papyrus
- FMUs and external tool integration, e.g. Simulink, Adams, Hopsan, Dymola
- Standalone: Open for integration into scripting frameworks, third-party tools, and specialized applications, e.g. flight simulators, optimization tasks

# FMI Master Simulation Tool: **OMSimulator**

Standalone: <https://github.com/OpenModelica/OMSimulator>

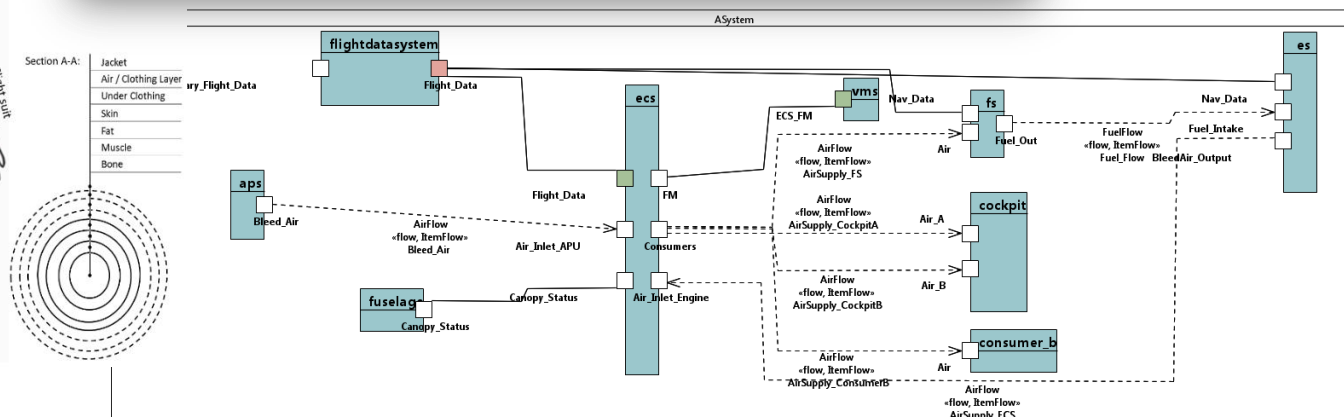

Integrated in OpenModelica tool suite: <https://openmodelica.org>

# Saab Aeronautics Demonstrator

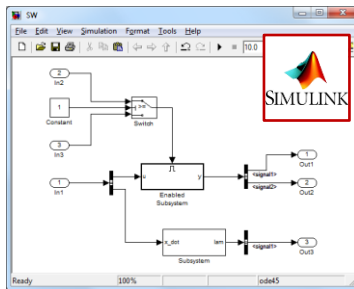

## FMI-based co-simulation of Aircraft Vehicle Systems

- **Demonstrate**
    - Standardized model export and integration into desktop simulators
    - Interoperability between different modeling tools/domains
    - Expansion in M&S of aircraft vehicle systems at Saab, increased scope, availability, and utilization of “high fidelity” simulations
  - **OMSimulator development**
    - Input to requirement specification
    - Aid in development prioritization
    - Verification in an industrial setting
  - **Multiple languages/tools involved**
    - Modelica (OpenModelica, Dymola)
    - xtUML (Bridgepoint)
    - SysML (Papyrus)
    - Simulink
- 
- A diagram of a human figure from the waist up, showing internal physiological systems. Red lines represent the circulatory system, and blue lines represent the respiratory system. A heart is visible in the chest area. Labels include 'Radiation' with a downward arrow at the top, 'Convection' with a curved arrow on the left side, and 'A-A' at the bottom right, indicating a cross-section.

# Updated way of working

## Model-Based Development of Aircraft Vehicle Systems

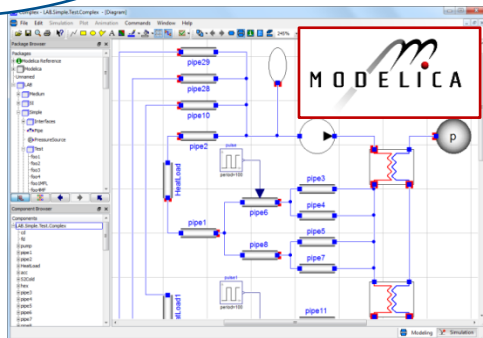

Design & Implementation of S/W

Test A/C

Test rigs & simulators

M&S of physical systems

# Summary & Conclusions

---

- **Open and transparent integration tools make sense**
- Enabling easy setup of FMI & SSP-based simulator applications at Saab
- FMI for increased efficiency in Saab's model integration workflow
- Workflow and tool support for FMI & SSP-based interoperability between system architecture (e.g. SysML) & system simulation (e.g. Modelica, Simulink)
- Industrial needs on standardization:
  - FMI: Provide means to improve **numerical robustness** and **simulation speed**: FMI Change Proposals (FCPs) #015, #010, #012, #013
  - SSP: Manage **simulation settings** and **external models**
- More info on OMSimulator: **Tuesday 11:00, Session 1C: FMI 1**
